Education

B.Tech. in Computer Science and Engineering	2026
VIT Bhopal University CGPA: 8.87/10	
Class XII Nazareth Academy, Bihar Percentage: 93.2%	2021
Class X Nazareth Academy, Bihar Percentage:92%	2019

Technical Skills

Languages: Python, Java, JavaScript, HTML, CSS
Frameworks: Node.js, React.js
Databases: MongoDB, MySQL
Core Concepts: Data Structures and Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Internships

Software Development Engineer Intern Bluestock Fintech (Remote)	Dec 2024 – Jan 2025
Built a Full Stack Web Application (Admin Portal) and REST APIs for a mobile app delivering Nifty-100 fundamental analysis data using MERN stack with JWT authentication	

Projects

NAGARSAATHI- Powering Civic Tech for Every Ward MERN, Google OAuth , ML	 April 2025
- Developed a QR-enabled web app for ward-wise complaint registration (safety/water/drainage/waste) with real-time tracking and an admin panel for status updates & analytics. - Enhanced security via two-step admin verification to reduce data risks and integrated AI/ML models - Streamlined user experience with QR-scan complaint submission and automated ward-wise reports for officials.	
Alumni-Student Connection Platform React, Vite, Tailwind CSS, Express.js, MongoDB	 Jan 2024
- Engineered an alumni networking platform with personalized AI chatbot, interactive chat section, and dynamic feed to enhance engagement and career opportunities. - Merged event management and AI-powered job recommendations to help users discover relevant opportunities. - Integrated secure user authentication and scalable data management to ensure seamless interactions. - Optimized performance with caching & query optimization, reducing load times by 50%, while OAuth 2.0 cut security incidents by 30%.	
Virtual AI Mouse Python, MediaPipe, OpenCV, win32api, PyAutoGUI	 March 2023
- Built a real-time hand-tracking system using MediaPipe & OpenCV, achieving 30 FPS processing with <100ms latency for smooth cursor control. - Implemented pinch-click detection with 95% accuracy by calculating Euclidean distance between thumb and index finger (threshold: 30px). - Automated mouse movements using win32api & PyAutoGUI, reducing manual input time by 40% in usability tests.	

Achievements

- Hackathon Recognition:** Recognized as Next-Gen Thinker at Providence Leap Ideathon for proposing a web app-based solution with SMS/voice-enabled healthcare access, enabling 3x broader access and 30% more accurate records using ML-driven input validation.
- Algorithmic Solutions Development:** Solved 250+ problems on GeeksforGeeks & 350+ on LeetCode, specializing in DSA (Java). Achieved university rank 700 on GFG, demonstrating analytical and coding proficiency.

Certifications

Marketing Analytics – NPTEL, IIT Kharagpur	April 2025
Winter Internship Technical Training Program – India Space Lab	Jan 2025
Cloud Computing – NPTEL, IIT Kharagpur	May 2024
